1. Keyword Research Master Sheet

Researched for the Saudi Arabia market (KSA). Primary language: Arabic & English. Location codes: SA / Riyadh / Jeddah / Dammam.

1.1 Core Seed Keywords

Keyword	Type	Intent / Notes
أوتوماتيكية أبواب	Primary AR	High commercial intent — automatic doors
automatic doors Saudi Arabia	Primary EN	High commercial — B2B + B2C
انزلاقية أبواب	Secondary AR	Sliding doors — high volume
دوارة أبواب	Secondary AR	Revolving doors
أمنية بوابات	Secondary AR	Security gates
أوتوماتيكية نوافذ	Secondary AR	Automatic windows
تحميل أنظمة	Secondary AR	Loading systems — B2B logistics
entrance automation KSA	EN Commercial	Commercial intent
automatic door supplier Riyadh	EN Local	Transactional — high buyer intent
loading dock system Saudi	EN B2B	Industrial buyer intent

1.2 Commercial & Transactional Keywords

Keyword	Notes / Intent
أوتوماتيكي باب سعر	Transactional — price research
الرياض أوتوماتيكية أبواب تركيب	Local transactional — Riyadh installation
جدة أوتوماتيكية أبواب تركيب	Local transactional — Jeddah installation
السعودية أوتوماتيكية أبواب شركة	Commercial — supplier search
أوتوماتيكية أبواب أفضل	Commercial — best products
buy automatic door Saudi Arabia	Transactional EN — buyer intent
automatic door installation cost KSA	Transactional — price query

automatic door company Riyadh	Local commercial EN
أوتوماتيكية أبواب صيانة	Post-sale commercial — maintenance
أوتوماتيكية أبواب غيار قطع	Commercial — spare parts

1.3 Long-Tail & Question Keywords

Keyword	Notes / Intent
الأوتوماتيكية الأبواب تعمل كيف	Informational — top of funnel
الأوتوماتيكية الأبواب أنواع هي ما	Informational — funnel entry
للمول أوتوماتيكي باب نوع أفضل	Commercial long-tail — retail
للمستشفى أوتوماتيكي باب	Vertical commercial — healthcare
للفندق أوتوماتيكي باب	Vertical commercial — hospitality
how long do automatic doors last	Informational EN — buyer concern
automatic door maintenance contract KSA	Commercial — service contract
sliding door vs revolving door	Informational — decision stage
fire-rated automatic door Saudi Arabia	Niche commercial — compliance buyer
automatic door for warehouse Saudi	B2B industrial long-tail

1.4 Local & Geo-Targeted Keywords

Keyword	Notes / Intent
الرياض أوتوماتيكية أبواب	Riyadh — highest search volume city
جدة أوتوماتيكية أبواب	Jeddah — second largest market
الدمام أوتوماتيكية أبواب	Dammam — Eastern Province industrial
مكة أوتوماتيكية أبواب	Makkah — hospitality & religious sites
المدينة أوتوماتيكية أبواب	Madinah — hospitality & religious sites
automatic door Riyadh supplier	EN local — B2B procurement
entrance systems Jeddah	EN local — broader
loading dock Dammam	EN local — industrial / logistics

1.5 Semantic & LSI Keywords

Keyword	Notes / Intent
أوتوماتيكية دخول بوابة	Entrance gateway — semantic variant
الدخول في التحكم نظام	Access control system — related topic
للأبواب الحركة كاشف	Motion sensor doors — feature query
الكهربائية الأبواب حساسات	Electric door sensors — technical LSI
أبواب خضراء طاقة	Energy-efficient doors — sustainability angle
door automation system	Semantic EN variant
pedestrian door automation	Pedestrian access — semantic
automatic barrier system	Related product — semantic
bollard systems Saudi	Related security product
speed gate turnstile KSA	Related access control product

1.6 Entity Suggestions (for Schema & Knowledge Graph)

Include these entities in structured data and content to strengthen topical authority:

- Organization: Madar Randa — automatic door company, Saudi Arabia
- Product categories: Automatic Sliding Doors, Automatic Swing Doors, Revolving Doors, High-Speed Doors, Loading Dock Levelers, Security Barriers
- Service: Installation, Maintenance, After-Sales Support, Spare Parts Supply
- Location entities: Riyadh, Jeddah, Dammam, Makkah, Madinah, Eastern Province, KSA
- Industry verticals: Retail, Healthcare, Hospitality, Logistics, Warehousing, Government, Education
- Certifications to mention: CE Marking, ISO standards, local SASO compliance

2. Homepage

2.1 Content Audit

Common weaknesses found in automation company homepages in KSA:

- Hero headline is product-focused, not outcome-focused
 - No clear value proposition in the first 3 seconds
 - CTAs are generic ('Contact Us', 'Learn More') — no conversion trigger
 - Trust signals (years of experience, project count, certifications) are buried or absent
 - Services section lists product names without customer benefit
 - No social proof — no client logos, testimonials, or project numbers
-

2.2 Improved Copy

About Preview

Madar Randa is a Saudi-based specialist in entrance automation and security solutions. We work with developers, facility managers, and project owners who need solutions that are engineered correctly the first time — and maintained properly for years after.

Services Introduction

We supply and install the full range of entrance automation systems:

- Automatic Sliding Doors — the reliable choice for high-traffic entrances
- Automatic Swing Doors — for accessible, welcoming spaces
- Revolving Doors — controlling airflow and footfall in large facilities
- High-Speed Doors — maximizing efficiency in logistics and industrial sites

- Loading Dock Systems — protecting goods and streamlining operations
- Security Gates & Barriers — controlling access with precision
- Automatic Windows — combining convenience with energy efficiency

Why Choose Madar Randa

We are not a general trading company. Entrance automation is what we do — exclusively. That specialization means every project benefits from focused engineering expertise, proper installation, and genuine after-sales support.

- Projects delivered across Saudi Arabia
- Certified engineers on every installation
- Genuine manufacturer warranties
- Responsive maintenance contracts available
- Emergency service response

Trust Section

You can expect:

- A clear quotation with no hidden costs
- An installation team that respects your project timeline
- Doors that work reliably from day one — and for years after
- A single point of contact from enquiry to commissioning

Final CTA

Ready to get started? Our engineers are available to assess your project and recommend the right solution.

2.4 Homepage FAQ

Q: What types of automatic doors does Madar Randa supply?

A: We supply and install automatic sliding doors, swing doors, revolving doors, high-speed doors, loading dock systems, security barriers, and automatic windows — serving projects across Saudi Arabia.

Q: Do you provide installation and after-sales maintenance?

A: Yes. Every project includes professional installation by certified engineers, and we offer ongoing maintenance contracts to keep your systems performing reliably.

Q: Which cities do you serve in Saudi Arabia?

A: We serve clients across the Kingdom, with primary coverage in Riyadh, Jeddah, Dammam, Makkah, and Madinah.

Q: How do I get a quotation?

A: Contact us via WhatsApp or our quotation form. We will assess your requirements and provide a detailed, no-obligation proposal.

3. About Page

3.1 Content Audit

- Most 'About Us' pages for automation companies in KSA read like corporate boilerplate
 - Missing: a genuine story that builds trust
 - Missing: concrete proof points (years, projects, team size)
 - Vision/Mission statements are usually meaningless — rewrite them to say something real
-

3.2 Improved Copy

Page Headline

Built on Engineering. Measured by Your Satisfaction.

Company Story

Madar Randa was founded to solve a real problem in the Saudi market: projects were getting automatic doors installed by companies that treated it as a secondary service.

The result was poor product selection, shortcuts on installation, and zero support after the sale.

We built Madar Randa differently — focused entirely on entrance automation. No distractions. No half-measures.

Today, our work is in the entrances of retail centers, hospitals, hotels, warehouses, and government buildings across the Kingdom. Our reputation is built on one thing: doing the job correctly.

What We Do

We engineer, supply, and maintain complete entrance automation systems. This includes automatic sliding doors, swing doors, revolving doors, high-speed industrial doors, loading dock systems, security barriers, and automatic windows.

Every solution is selected to match the specific demands of your project — foot traffic volume, building design, usage environment, and long-term performance requirements.

Vision

To be the most trusted entrance automation company in Saudi Arabia — chosen by clients who refuse to compromise on quality.

Mission

To deliver entrance systems that perform reliably, look professional, and protect the people and assets they serve — backed by expert installation and genuine after-sales support.

Core Values

- Engineering Integrity — we specify what is right for the project, not what is most profitable for us
- Reliability — systems that work on day one and continue working
- Accountability — we answer for the quality of our work
- Long-Term Thinking — we are here after the sale, not just before it

Why Choose Madar Randa

Entrance automation specialists only — not a general fit-out company trying to add doors to its list.

- Dedicated project engineers, not generalist salespeople
- Manufacturer-certified installation teams
- Genuine product warranties honored
- Maintenance contracts with defined response times
- Experience across retail, healthcare, hospitality, industrial, and government sectors

Final CTA

Speak with one of our engineers about your project. We will give you an honest assessment and a clear proposal.

4.2 Product Cards Copy

Automatic Sliding Doors

The go-to choice for high-traffic entrances. Smooth, silent, and space-efficient — sliding doors deliver the professional first impression your project deserves while handling thousands of daily cycles reliably.

Best for: Retail, hospitality, healthcare, commercial office buildings.

→ **Explore Sliding Door Solutions**

Automatic Swing Doors

Where accessibility meets elegance. Swing doors deliver a wide, welcoming opening — fully compliant with accessibility standards and smooth in operation.

Best for: Banks, clinics, boutique retail, accessible entrances.

→ **Explore Swing Door Solutions**

Automatic Revolving Doors

The intelligent entrance for large facilities. Revolving doors control airflow, manage foot traffic, and project a premium brand impression — all simultaneously.

Best for: Hotels, corporate headquarters, airports, large commercial developments.

→ **Explore Revolving Door Solutions**

High-Speed Doors

Designed for environments where time is money. High-speed doors open and close in seconds, minimizing energy loss and maximizing throughput in industrial and logistics environments.

Best for: Warehouses, cold storage facilities, food production, logistics hubs.

→ **Explore High-Speed Door Solutions**

Loading Dock Systems

Protecting your goods from the moment they arrive. Loading dock levelers, shelters, and seals create a safe, weatherproof interface between your building and your fleet — reducing damage, theft risk, and operational delays.

Best for: Distribution centers, factories, supermarket supply chains, 3PL operations.

→ **Explore Loading Dock Solutions**

Security Gates & Barriers

Access control that takes no shortcuts. From boom barriers to speed gates and security bollards, our systems manage vehicle and pedestrian access with precision.

Best for: Parking facilities, corporate campuses, government buildings, gated communities.

→ **Explore Security Barrier Solutions**

Automatic Windows

Ventilation and natural light, automated. Our automatic window systems integrate with building management systems to optimize airflow and reduce cooling costs — while remaining operable manually when needed.

Best for: Offices, educational facilities, commercial buildings pursuing energy efficiency.

→ **Explore Automatic Window Solutions**

5a. Automatic Sliding Doors

5a.1 Improved Copy

Hero Heading

Sliding Doors That Work — Every Cycle, Every Day

Introduction

Automatic sliding doors are the most widely used entrance system in the world — because they work. They handle high foot traffic quietly, open without requiring physical effort, and contribute directly to energy efficiency by reducing uncontrolled airflow.

At Madar Randa, we supply sliding door systems engineered for the demands of the Saudi climate and the cycle counts of busy commercial spaces.

What You Get

- Smooth, quiet operation — no mechanical noise that undercuts your brand
- High cycle-count reliability — designed for thousands of daily operations
- Energy savings — minimal air exchange between interior and exterior
- Safety sensors — pedestrian detection to prevent collision
- Accessible entry — no physical effort required, welcoming to all users
- Custom dimensions — to suit your architectural opening

Applications

- Supermarkets and retail shopping centers
- Hotels and serviced apartments
- Hospitals and clinics
- Commercial office buildings
- Airport terminals and transport hubs
- Pharmacies and bank branches

Why This Product Is Worth the Investment

A low-quality automatic sliding door will show its faults quickly — erratic sensors, worn drive mechanisms, and doors that need constant attention. Our systems are selected for durability, with components that deliver consistent performance over years, not months.

The cost of a quality door is paid back in reduced maintenance calls, consistent operation, and the professional impression your entrance makes every single day.

Installation

Our certified installation teams handle the complete process — structural assessment, system fitting, sensor calibration, and commissioning. No subcontractors. No shortcuts.

Warranty

All systems come with manufacturer warranty coverage. Extended coverage and maintenance contracts available.

FAQ — Sliding Doors

Q: How long do automatic sliding doors last?

A: A correctly specified and professionally installed sliding door system will reliably serve for 10–15 years or more. Regular maintenance significantly extends operational life.

Q: Can sliding doors handle the Saudi climate?

A: Yes. We specify systems rated for high-temperature environments, with components designed to perform in the heat and dust conditions typical of Saudi Arabia.

Q: Are they safe around children?

A: Modern systems use dual-beam safety sensors to detect pedestrians, including children, and prevent the door from closing if someone is in the opening.

5b. Automatic Swing Doors

5b.1 Improved Copy

Hero Heading

The Accessible Entrance. Engineered for Reliability.

Introduction

Automatic swing doors open wide and welcome everyone — including wheelchair users, those with mobility aids, and customers carrying heavy loads. They deliver accessibility compliance without sacrificing the aesthetic quality of your entrance.

They are the right choice wherever an inclusive, dignified entry experience is required.

What You Get

- Compliant with accessibility standards — ADA and Saudi equivalent requirements
- Smooth, controlled swing motion — adjustable speed for different environments
- Single and double leaf configurations
- Hold-open function for high-traffic periods
- Manual override — doors remain usable during power interruption
- Activation via push pad, motion sensor, or access control integration

Applications

- Bank branches and financial institutions
- Medical clinics and outpatient facilities
- Boutique retail and luxury stores
- Government service centers
- Accessible entrances in all building types

5c. Automatic Revolving Doors

5c.1 Improved Copy

Hero Heading

The Premium Entrance. The Efficient Entrance.

Introduction

Revolving doors do something no other entrance system can: they manage large volumes of foot traffic while simultaneously controlling the building's interior environment — preventing air exchange, reducing HVAC loads, and projecting an unmistakably premium brand impression.

For hotels, corporate towers, and major retail destinations, a revolving door is not a luxury — it is the intelligent engineering choice.

What You Get

- Continuous traffic flow — no stopping and waiting
- Superior airlock effect — dramatically reduces HVAC energy consumption
- Premium visual impact — sets the tone for the entire building
- Safety wings and auto-collapse features — certified safety standards
- Diameter and finish customization — to suit your architectural brief
- Integrated access control — for secure environments

Applications

- Five-star hotels and hospitality venues
- Corporate headquarters and towers
- Airport passenger terminals
- Large retail destinations
- Premium office buildings

5d. Automatic Windows

5d.1 Improved Copy

Hero Heading

Smart Ventilation. Automated.

Introduction

Automatic windows integrate ventilation into your building's intelligence — responding to temperature, air quality, and occupancy to optimize airflow without manual intervention. For facilities pursuing energy efficiency and occupant comfort, automated window systems deliver measurable results.

What You Get

- BMS integration — connects to building management systems
- Scheduled or sensor-triggered operation
- Smoke and fire safety override — windows open automatically in emergencies
- Manual override function — usable without automation when needed
- Energy savings — natural ventilation reduces mechanical cooling load
- Multiple actuator types — chain, rack-and-pinion, spindle — for different window configurations

Applications

- Commercial offices
- Schools and universities
- Healthcare facilities
- Mosques and community facilities
- Any building pursuing LEED or Mostadam certification

5e. Loading Dock Systems

5e.1 Improved Copy

Hero Heading

Your Supply Chain Starts Here. Protect It.

Introduction

The loading dock is where your supply chain meets your facility. A poorly designed or maintained dock creates delays, damages goods, creates safety hazards for workers, and allows pests and contamination into controlled environments.

Madar Randa supplies and installs complete loading dock systems — levelers, shelters, seals, and dock doors — engineered to the specific demands of your operation.

What You Get

- Dock levelers — bridging the height gap between truck and dock floor safely
- Dock shelters and seals — weatherproof interface that protects goods and workers
- Dock bumpers — protecting both building structure and vehicle
- Vehicle restraints — preventing truck movement during loading
- Safety lighting and controls — for compliant and efficient operations
- Cold store dock solutions — insulated seals for temperature-controlled environments

Applications

- Logistics and distribution centers
- Supermarket and retail supply chains
- Food production and cold chain facilities
- Manufacturing and industrial plants
- Pharmaceutical storage and distribution

Why This Matters

Every minute a loading dock is delayed costs money. Every gap in a poorly sealed dock risks contamination, temperature loss, or theft. Our systems are engineered to eliminate these problems — and our maintenance contracts keep them working.

CTA

→ **Request a Loading Dock Assessment**

→ **Talk to Our Industrial Solutions Team**

Long-tail	loading dock leveler for cold store Saudi Arabia, loading dock shelter Riyadh

5f. High-Speed Doors

5f.1 Improved Copy

Hero Heading

Milliseconds Matter in Industrial Environments.

Introduction

High-speed doors are engineered for operational intensity — opening and closing in seconds rather than minutes, minimizing the air, temperature, dust, and noise transfer between zones. They protect your environment, your products, and your people.

In a busy warehouse or production facility, a conventional sectional door left open for even a few minutes represents real cost. High-speed doors eliminate that waste.

What You Get

- Opening speeds from 1.0 to 2.5 m/s — dramatically faster than standard industrial doors
- Automated activation — radar, loop detector, push button, or fork-lift trigger
- Bottom-edge safety contact — door resets automatically on obstacle contact
- Minimal maintenance design — fewer mechanical components, longer service intervals
- Temperature zone integrity — maintaining cold chain or cleanroom conditions
- High cycle life — engineered for 200,000+ annual cycles

Applications

- Cold storage and temperature-controlled warehouses
- Food and beverage production
- Pharmaceutical and cleanroom environments
- Automotive paint shops and assembly
- Logistics sorting centers

CTA

→ Request a High-Speed Door Quotation

5g. Security Gates & Barriers

5g.1 Improved Copy

Hero Heading

Control Who Enters. Protect What Matters.

Introduction

Security barriers and gates are the first line of physical access control — managing which vehicles and pedestrians enter your facility, recording movements, and creating deterrence against unauthorized access.

We supply and install a complete range of access control hardware: from boom barriers for parking facilities to anti-terror bollards for critical infrastructure.

What You Get

- Boom barriers — fast, reliable vehicle access control for parking and commercial sites
- Speed gates and turnstiles — pedestrian access with seamless integration to card or biometric readers
- Security bollards — fixed and retractable, for perimeter protection
- Sliding and swing security gates — for vehicle entry to compounds and facilities
- Integration with CCTV, access cards, biometrics, and intercom systems
- Crash-rated options — meeting K4/K8/K12 rated standards for high-security sites

Applications

- Corporate campuses and commercial office parks
- Government and public buildings
- Hotel drop-off and vehicle access
- Residential compounds
- Parking management operations
- Critical infrastructure and industrial perimeters

6.2 SEO — Contact Page

Keyword	Notes / Intent
URL	/contact / بنا-اتصل

SEO Title	Contact Madar Randa Automatic Door Specialists Saudi Arabia
Meta Description	Contact Madar Randa for automatic door supply, installation, and maintenance across Saudi Arabia. WhatsApp available. Request a free project quotation today.
Primary Keyword	contact automatic door company Saudi Arabia
Schema	ContactPage + LocalBusiness

7. Trust & Conversion Optimization Guide

7.1 Trust Signal Placement Map

Keyword	Notes / Intent
HOME PAGE	Experience badge, project count, certifications — visible above the fold
ABOUT PAGE	Year founded, team credentials, named values — in the narrative
PRODUCT PAGES	Warranty duration, certifications, 'installed in X projects' near CTA
CONTACT PAGE	Response time commitment ('within X hours'), support promise
ALL PAGES	WhatsApp floating button — always accessible

7.2 CTA Strategy

Every page should have a primary and secondary CTA. The primary CTA drives the conversion action. The secondary CTA captures users not yet ready to commit.

Keyword	Notes / Intent
Primary CTA (high intent)	Request Your Free Quotation / Request a Consultation
Secondary CTA (nurturing)	Talk to Our Engineers / Explore This Solution
WhatsApp CTA (friction-free)	Message Us on WhatsApp — fastest response
Avoid	'Learn More', 'Contact Us', 'Click Here' — zero conversion power

7.3 Conversion Elements Checklist

- Floating WhatsApp button — visible on all pages, all devices
- Response time promise on Contact page ('we respond within X business hours')
- 'No obligation' language near quote CTAs — reduces perceived risk
- Project photography — real installed examples build credibility
- Client sector logos (with permission) — shows breadth of experience
- Short video of a product in operation — highest-converting content type for door products
- Certifications displayed with logos, not just text

- Maintenance contract mention on every product page — signals long-term partnership

7.4 Internal Linking Strategy

Keyword	Notes / Intent
Homepage → Products Listing	From 'Our Solutions' section
Homepage → Contact	From every CTA
About → Products	From 'What We Do' section
Products Listing → Each Product	From product cards
Product Pages → Contact	From every page CTA
Product Pages → Related Products	Cross-link relevant products (e.g. Sliding → High-Speed)
All Pages → WhatsApp	Floating button + inline mentions

7.5 Schema Markup Summary

Keyword	Notes / Intent
Homepage	Organization + LocalBusiness + WebSite
About Page	Organization + AboutPage
Products Listing	ItemList with links to each Product
Product Pages	Product + FAQPage + Breadcrumb
Contact Page	ContactPage + LocalBusiness

7.6 Image ALT Text Template

Format: [Product name] [action] [location] — Madar Randa Saudi Arabia

Examples:

- 'Automatic sliding door installation Riyadh shopping center — Madar Randa'
- 'High-speed industrial door warehouse Dammam Saudi Arabia — Madar Randa'
- 'Security boom barrier corporate campus Jeddah — Madar Randa'
- 'Loading dock leveler distribution center Saudi Arabia — Madar Randa'

7.7 Page Speed & Technical SEO Notes

- Serve all images in WebP format with lazy loading
- Arabic and English content on same URL with hreflang tags, OR separate /ar/ and /en/ subdirectories
- Breadcrumb navigation on all product pages — supports schema and UX
- Mobile-first — majority of Saudi users reach via smartphone
- WhatsApp CTA opens pre-filled message: 'Hello, I would like to request a quotation for [product]'
